

RIMA ALENIZY

SOFTWARE ENGINEER

PERSONAL PROFILE

I am a fresh software engineering graduate, with a focus on web development. During my studies, I acquired good programming skills, especially in object-oriented, front-end, and back-end. I had the opportunity to apply my knowledge in programming and problem-solving skills during several projects. Throughout my working experience, I had the chance to improve and apply my skills in the web development field through different projects. I obtained and enhanced many skills such as time and project management, teamwork.
